

Experience Report

1. I have Used Stack overflow which helped me a lot when I stuck and get errors while I am doing my assignment
2. I have used bootstrap documentation for UI styles tables etc.
3. I have used ChatGPT for bootstrap styles and how to implement tables using bootstrap.
4. I have found that ChatGPT is not giving accurate results and solution for the problems or error occurred I have found that the stack overflow which is the best guide to resolve errors.
